REMARKS

Applicants wish to elect the invention of Group I (claims 19-22) drawn to an antibody which specifically binds to an epitope defined by at least 10 amino acid sequence from human DNA-PKcs comprising a phosphorylated threonine at T2609. Applicants have also added new claims directed to methods for radiosensitizing cells using the antibody.

A petition for a two-month extension of time accompanies this response. The Commissioner is hereby authorized to charge any fees due to deposit account no: 50-0624.

Respectfully submitted,
